145 notes

Finish the process and receive your free coins.

In this video, you can clearly see that the user has generated some coins for their Tiktok using this website and they were credited immediately to his account. Don't expect this much speed always because this website has a higher traffic now and therefore the server is a bit slow in functioning such as assigning the coins to the users. A delay of up to one hour is possible at peak hours, especially USA time 6PM to 12AM.
